

NANA Master Plan team working on history update

Description

The NANA Master Plan team is working on the Existing Conditions/History section of our Master Plan update project. The previous Master Plan was from 1974 and included a good summary of the foundation and early history of our neighborhood as a village and as incorporated by the City.

We are working on the history since 1974 and would be interested in photos or stories, particularly regarding the development of North Avondale's culture of acceptance and diversity.
