

## New School Montessori 6th Graders Presented Their Senior Projects

### Description

This year's senior project presentations were, as always, enlightening and full of good information about a wide array of interesting topics. Our 6th grade students work all year on the process required to deliver a 5-minute slideshow presentation on their topic of choice. Teachers guide them along the way as they first get familiar with the resources at Cincinnati's downtown library, and then learn to take notes, make an outline and start writing their 10-page page paper. Then comes the difficult work of summarizing, memorizing and presenting their research to family, teachers and peers. They never fail to knock our socks off!
