

TNSM's Kaleidoscope Center has opened [VIDEO]

Description

The New School Montessori was thrilled to have so many North Avondale neighbors, friends, alumni and current families explore our beautiful new space at the open house for the Kaleidoscope Center. It is such a fantastic addition to the neighborhood and a resource to our community.

The Kaleidoscope Center is designed to promote the arts and community dialogue, hosting live performances and providing a space for gathering, sharing and celebrating. We are immensely proud of the design, which was brought to life by Elevar and Lisa Cameron, a current TNSM parent and senior designer. Their vision and expertise have created a truly inspiring environment for our students and community.

We extend our heartfelt thanks to all who made the Kaleidoscope Center possible through contributions, large and small. Your support is remembered, honored and celebrated in the laughter, learning, and discovery happening within these walls.

As many of you know, a group of butterflies in flight is called a kaleidoscope. This beautiful image inspired the name of our new center, symbolizing the diverse, vibrant and transformative experiences that will unfold within its walls.

Together, let's take flight and embark on this exciting new chapter at The New School Montessori!
